Quality, Environment and Food Safet Policy

Vantage Specialties Spain, S.L.U. is part of the manufacture, marketing and distribution of products for the cosmetic and food industry.

Vantage Specialties Spain, S.L.U. is aimed at a very competitive market, both in the European Union and worldwide. This implies the need and the will to adapt to modernization, change in management systems and the integration of people in a common goal.

With these perspectives, Vantage Specialties Spain, S.L.U. has the concern to consolidate its position in the market in the short, medium and long term, based on the professionalism of the team, on the efficiency of its organization and always in compliance with legal and regulatory requirements.

In this sense, we must guarantee the trust of our clients by relying on an Integrated Management System, based on an Analysis of Hazards and Critical Control Points (HACCP) and a risk analysis of the entire system according to the requirements of GFSI (Global Food Safety Initiative).

The objective of the Group's Policy is to consolidate this reality, always improving the service and attention to the requirements of our customers, based on the periodic definition of objectives, the evaluation of customer satisfaction, developing continuous improvement programs, based on the reviews carried out of the system, the protection of food safety, the protection of the environment and the prevention of contamination.

Vantage Specialties Spain, S.L.U. undertakes to continuously maintain and improve its Integrated Management System according to the ISO 9001:2015, ISO 14001:2015 Standards, the FSSC 22000 food safety standard, the Halal and Kosher standards and following an approximation of the GMP's cosmetic standard as model to follow, declaring the Management the commitment of compliance by ALL THE PERSONNEL OF THE ORGANIZATION with the guidelines defined in said system. In Vantage Specialties Spain, S.L.U the environment and context of the organization are valued, the needs and expectations of the interested parties are valued and a risk and opportunity management process is available, where the life cycle of our products is considered/ services.

Likewise, Vantage Specialties Spain, S.L.U. complies with regulations and defines development objectives in terms of social and environmental responsibility. The commitments include key aspects of the CSR approach (human rights, labour relations and conditions, the environment,

social integration, good business practices, etc.). The policy clearly includes a purpose of continuous improvement in labour welfare and good working conditions based on the For Life standard.

Vantage Specialties Spain, S.L.U promotes and undertakes to continue developing ecological and healthy production procedures for consumers, responsible use of natural resources, promoting respect for biodiversity, absence of Genetically Modified Organisms (GMOs) and absence of petrochemical ingredients. in the products according to the requirements of the Ecocert – COSMOS standard.

The Quality System described in the Quality Manual has been developed under the direction of Management and has its full support. All the details of the integrated management system are described in the Manual, Documented Procedures and Work Instructions.

It is the responsibility of the Management and of all the workers to promote communication between people belonging to the company and to improve the effectiveness of communication with outside personnel who are interested in the company, whether they are customers or suppliers.

Although the coordination and execution of the necessary actions for the maintenance of the system is delegated to the person in charge, the ultimate responsibility for obtaining it falls on Management, who guarantees the human, technical and economic means necessary to achieve them.
